## Professional Summary

Senior Flutter Engineer with 4+ years of experience specialized in building high-performance, secure mobile applications. I maintain a **99.6% crash-free rate** for apps with **100,000+ downloads**, ensuring that technical excellence meets real-world reliability. I bridge the gap between **Engineering, Design, and Product**. My approach is "Product-First"—I don't just write code; I help define the user journey to ensure features solve true user pain points. Through leading my own startup challenge (**Dongkrak**), I developed a deep understanding of market-fit, rapid prototyping, and scaling an MVP under pressure.

**CEH Certified (91.2/100)** and **TOEIC (870/990)**. I am a proactive collaborator who works closely with UI/UX teams to research user needs, and conduct technical feasibility studies.

| <ul style="list-style-type: none"><li>• <b>Owned the end-to-end development lifecycle</b> for the CUiT mobile ecosystem, serving as the technical lead to bridge the gap between complex engineering requirements and executive business goals set by the CTO and C-level stakeholders.</li><li>• <b>Architected and pioneered high-complexity engagement features</b> from the ground up, including a proprietary gamified ranking system and a modular multi-mission rewards framework, directly contributing to increased user session length and retention.</li></ul> |                     |

- **Eliminated critical performance bottlenecks** within the primary feed and re-engineered infinite scroll logic to ensure a high-performance UI/UX; maintained professional-grade stability as the platform scaled rapidly to **100k+ downloads**.
- **Spearheaded mission-critical enterprise integrations**, including the Buzzco community platform for **Bank Mandiri (IDX: BMRI)**, ensuring seamless delivery and alignment with large-scale institutional security and performance standards.

## PT Rintis Sejahtera

Rintis is 1 of 4 switching institutions in Indonesia.

### IT Development Switching

Jun 2021 - Sep 2021

- **Built a message validator** to parse ISO 8583 messages and verify them against specific QR payment standards.
- **Monitored System Integration Testing (SIT)** for the rollout of QR payment features across the ATM Prima network.
- **Worked with the ISO 8583 protocol and Base24 programming** to understand and handle real-time interbank financial transactions.

## PT Gihon Telekomunikasi Indonesia, (IDX: GHON)

Gihon is a Telecommunication infrastructure company.

### Full-stack Developer, [Internship Report](#), from KC UMN

Jul 2020 - Mar 2021

- **Owned the end-to-end development** of a digitized Project Management system, designing both the UI and API to transition the company's mission-critical tower site-building process from legacy paper-based workflows to a streamlined web application and finish the project in under 6 months.
- **Engineered an automated lifecycle tracking system** for 60+ production sites; successfully digitized the entire workflow from initial site survey to final User Acceptance Testing (UAT), drastically reducing manual overhead and human error.
- **Accelerated internal approval cycles** by centralizing site documentation, fostering a more collaborative environment between field engineers and management, and eliminating physical paperwork bottlenecks.
- **Validated system reliability through field-based User Acceptance Testing (UAT)**; directly engaged with on-site teams to perform troubleshooting and iterative improvements, ensuring the platform remained resilient in high-pressure operational environments.

## Education, Training, & Certifications

---

Multimedia Nusantara University  
 Certified Ethical Hacker (CEH)  
 TOEIC

Bachelor of Science, Computer Science Major. GPA: **3.61 / 4.00**  
[Certificate](#). Score: **91.2 / 100**  
[Certificate](#). Score: **870 / 990**

## Honor & Achievements

---

**Favorite SkyPreneur (Jury's Choice), SkyStar Ventures Batch 8 (2021):** Developed **DONGKRAK**, a specialized Point of Sale (POS) system tailored for automotive workshops.

**3rd Place, Computer Science Innovation Challenge (National):** Engineered **NUSA**, an interactive regional language learning application featuring real-time chat functionality with native speakers.

**Languages:** Go, Python, Java, JavaScript/TypeScript, SQL, Bash, C/C++, HTML/CSS, Swift, Dart, PHP, Kotlin.

**Framework & Tools:** Docker, Swagger, Postman, Git, GitHub Actions, CI/CD, Flutter, React, Jetpack Compose, Codemagic, Figma, Localazy, Sentry, Shoebird.

**Databases:** PostgreSQL, MySQL, MongoDB.

**Architecture & Patterns:** API Design (REST, gRPC).

**Other:** Riverpod, BLoC, ISO 8583, Base 24, Product Management, Mockito.
